Web Skills

HTML | CSS | Bootstrap | Materialize | Bulma | JavaScript | React | JQuery | AJAX | Axios | ES6 | Object Oriented Programming | PWA(Progressive Web Apps) | Handlebars | EJS | Gatsby | Node.js | Express | MVC | NPM | Server Side APIs | Ruby | Ruby on Rails | Passport.js | Auth0 | MySQL | Sequelize | NoSQL | MongoDB | Mongoose | MySQL Workbench | Robo 3t | MongoDB Cloud Atlas | GraphQL | Git | Github | Command line | VS Code | Atom | Postman | SnipCart

EXPERIENCE

Tyler Snyder Development, South Jordan, UT - *Freelance Web Developer*

May 2020 - Present

- **TLC Medical Transport**
- Developed an eCommerce website using React, Gatsby, GraphQL, SnipCart and Google Maps API to modernize the look, feel and function of TLC Medical Transport's main website.
- Educate clients on how to market their business.
- This website was built with Gatsby.js which is a React library. The content on this site is managed through Contentful and GraphQL. Users can also purchase products and check out easily and securely with SnipCart API.

University of Utah, Sandy, UT - *Student Web Developer*

November 2019 - May 2020

Completed a 6-month intensive software development Bootcamp focusing on full-stack web development. Worked and completed two full-stack group projects and one client-side javascript group project. Received certificate of completion of the Bootcamp and graded highly on all weekly assignments.

- **Trade and Play**
- Trade and Play is an application that allows users to register and signup using Passport.js for authentication. A user can collect NHL sports cards through booster packs and build a collection.
- This project was built with the MERN Stack and as a group I was in charge of database management and user authentication using Passport.js.
- Future plans for this project would be to allow users to trade cards with other users on the application.

- Our group received an award voted by the class for "Shut-up and take my money"

- **Employee Directory**
- React js front-end application allows users to view their entire employee directory at once so that they have quick access to their information.
- Currently, employees are being brought in from the RandomUsers.me API.
- Application was bootstrapped with the Create React App for easy setup.
